

# Artascope

Here's a Machine that makes IDEAS!"

## STYLE No. 3

The Artascope is an idea-machine. Under its magic lens you put some bits of trash . . . a couple of paper clips . . . a dab or two of paint . . . a scrap of tinted paper . . . odds and ends of colored crayon. AND, before the artist's eye, the ARTASCOPE spreads a whole new world of form and color.

The Artascope creates an endless variety of fantastic designs in flaming hues and pastel shades. A finger touch on the Artascope's revolving table and the whole scene changes into something marvellously new. You can vary the materials indefinitely. Sometimes you may feel stale, but your Artascope never does. It never fails to produce. No two effects are ever the same.
