The EAGLE Projector

A film show at home the minute you want it—that is what the new EAGLE PROJECTOR means.

£3 3s 0d. will buy the Projector the Transformer Screen, and two Films: one in full colour, and one in black-and-white.

All intelligent young people will immediately appreciate the handiness, simplicity, super efficiency, and safety of the EAGLE PROJECTOR.

It is handy because its attractive plastic case is only box camera size, and so strong that, barring bad accidents, it will stand up to endless use.

It is simple because it can be got ready for use in a second, and is operated solely by two knobs, i.e., the winding knob which projects the pictures, and the levelling knob which switches projection from one row of pictures to the next.

It is superlatively efficient because none of the parts, except the bulb, will ever need replacing. The inside components are of metal, and the mechanism cannot go wrong.

It is absolutely safe because it only needs six volts to work it. So no harmful electric shocks for you! It works from any Powerlite Battery, such as EverReady R.996 or off the house mains by means of the MiniCine Transformer. You will get bright pictures any distance from 1-12ft.
