

We Recommend for  
Perfect Projection  
SIEMEN'S 60 watt  
COILED COIL  
FILAMENT LAMPS

Price 2/1 each

Obtainable from any  
Electrical Supplier

All Projector Lens,  
when first used, are  
apt to mist over due  
to condensation in  
varying Temper-  
atures, but will clear  
in the course of a few  
minutes.

## OPERATING INSTRUCTIONS FOR "THE STIP MASTER" 35mm STRIP FILM PROJECTOR USING ORDINARY HOUSEHOLD ELECTRICITY SUPPLY

### PLEASE READ THESE NOTES CAREFULLY

You MUST use 60 XXXX watt COIL COILED CLEAR LAMP (Household type)

Use a good white surface for projection, in a dark room.

Keep Lenses free from DIRT and FINGER MARKS.

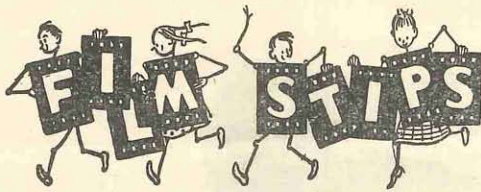

1. Connect a suitable plug to the free end of flex. See figure (A). This is simple, if in doubt obtain advice.
2. Remove LAMP BRACKET FIXING SCREWS (B), and slide out lamp bracket from inside of Projector (C). Insert lamp, replace bracket, seeing that the shaped filament of the lamp is facing the lenses inside projector, and in alignment with the front lenses (D). Tighten screws (B). **NOTE THE FOLLOWING VERY CAREFULLY.**  
If, when fitting lamp, the filament cannot be in exact alignment with the lenses, loosen bakelite ring holding lampholder, and turn holder until lamp filament is in correct position, tighten ring holding lamp holder. Plug in, switch on, and for final adjustment slacken off screws (B) and move lamp holder bracket either a little forward or backward until you have an even light on screen. Adjust Focus by pulling or pushing Lens tube (D) in or out.
3. Clip film Holder (E) behind gate (F), insert film into slot at top of gate (F), gently pushing down film till it touches XXXX sprockets. Film must be inserted upside down, with glossy side towards screen. Focus as above. Feed film by turning knob (G) in direction of arrow on diagram.

FOR BRILLIANT RESULTS DO PLEASE BE SURE THE LAMP IS CORRECTLY ADJUSTED.
