

HOW TO USE YOUR 3D VIEWER

- 1 Take everything out of the box

- 2 Put one card in the box and push it down to secure

- 3 Hold the box open and look through the lenses

WATCH THE VIDEO

See how to use your 3D viewer here:

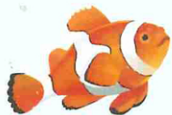

Animal not looking 3D?

Relax your eyes and focus as though you're looking through the card, into the distance.

Seeing triple?

If your animal is repeating, try moving the box further away from your face.

MINI GAME: MARINE MEMORY

Place a card in the box and look at it through the lenses for 20 seconds. Close the box and list at least five details you could see. If you get them right, keep the card. Now it's the next player's turn. The person with the most cards once you've played five each is the winner!

MINI GAME: DIVER DESCRIBERS

Pick a card and put it in the box. Look through the lenses and describe the ocean animal without saying its name. Other players should shout out which animal it is. See how many you can get right in 30 seconds! The Diver Descriptor keeps all the cards guessed correctly.

FLIP THE CARDS FOR FUN FACTS!

Why were orcas called killer whales? How big is a baby great white shark? Discover more about all the ocean animals you've encountered on the backs of the cards.
