

How to use your 3D viewer

- 1 Take everything out of the box

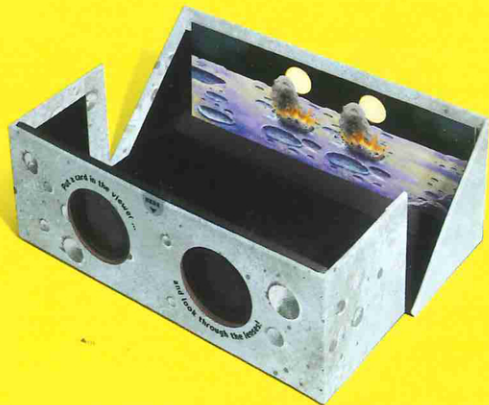

- 2 Put one card in the box and push it down to secure

- 3 Hold the box open and look through the lenses

3D viewer here:

Picture not looking 3D?

Relax your eyes and focus as though you're looking through the card, into the distance.

Seeing triple?

If the image is repeating, try moving the box further away from your face.

Mini Game: Total Recall

Place a card in the box and look at it through the lenses for 20 seconds. Close the box and list at least five details you could see. If you get them right, keep the card. Now it's the next player's turn. The person with the most cards once you've played five each is the winner!

Mini Game: Shouter Space

Pick a card and put it in the box. Look through the lenses and describe the planet or space object without saying its name. Other players should shout out what they think it is. See how many you can get right in 30 seconds! The describer keeps all the cards guessed correctly.

Flip the cards for fun facts!
