Dino not looking 3D?

Relax your eyes and focus as though you're looking through the card, into the distance.

Seeing triple?

If your dinosaur is repeating, try moving the box further away from your face.

FLIP THE CARDS FOR FUN FACTS!

Could a Microraptor fly? Which dino made the best parent? Discover more about all the dinosaurs you've encountered on the backs of the cards.

HOW TO USE YOUR 3D VIEWER & GAMES TO PLAY

MINI GAME: DINO DESCRIBERS!

Pick a card and put it in the box. Look through the lenses and describe the dinosaur without saying its name. Other players should shout out which dino it is. See how many you can get right in 30 seconds! The Dino Descriptor keeps all the cards guessed correctly.

MINI GAME: ROAR-SOME RECALL

Place a card in the box and look at it through the lenses for 20 seconds. Close the box and list at least five details you could see. If you get them right, keep the card. Now it's the next player's turn. The person with the most cards once you've played five each is the winner!
