

IMPORTANT DIRECTIONS

Please Read Carefully

1. Hold viewer in Right Hand with Lever down. With Left Hand insert in slot, end of film marked START. Push film completely through slot until it is flush at other end.
2. HOLD TRU-VUE like this: (Note carefully correct position of Thumb and Index finger).
3. Face toward window or strong light. Hold viewer close to your eyes, read title and with finger-tip pull lever quickly all the way toward thumb. Let it snap back. Repeat movement.

(OVER)

4. If first picture is not centered, adjust by pushing or pulling the film slightly to right or left.
5. It may appear that you have skipped a picture, but such is not the case. You are looking at two slightly different pictures at the same time—hence the picture you seem to skip is only moving into position for the next scene.
6. Always re-roll each film after viewing so as to have starting end on outside of film roll.

as you travel—

Buy *Tru-Vue Films* of the places you visit. You will soon have a library formed which will be a never ending source of pleasure to you and your friends.
