

**Instructions
for attaching the**

VIEW-MASTER

LIGHT ATTACHMENT to the MODEL E VIEWER

Hook **Fixed Clamp** at the top of the Light Attachment into the **Reel Slot** at the top of the **Viewer**.

Remove **Round Nut** at bottom of Attachment.

Fit **Loose Clamp** to bottom of Viewer and replace nut.

TO INSTALL BATTERIES

Twist coin in **Slot** in the **Small End** of the Attachment and remove top cover.

Lift square light switch **Button** just enough to put in **Size "D"** batteries—one **Right Side Up** and one **Up Side Down**.

Replace cover by slipping **Front Notch** under **Shoulders** of clamp, pressing **Button** forward, then **Snap Down** the back of the cover.

OVER

TO LIGHT

Press Square Button on Top of Light Attachment.

TO REPLACE LAMP

Remove Light Attachment from Viewer.

Pull out square light shield. If necessary remove white reflector by pressing down and pulling forward at the same time on the top edge of the reflector.

Unscrew burned-out lamp and replace with a new No. 14 lamp.

Replace reflector by seating the bottom corners between the front and rear plastic studs then press in top edge until reflector snaps into place.

Insert tab of light shield into slot in bottom of metal clamp and press bottom of shield into place.

PLUG-IN TRANSFORMER

A View-Master Plug-In Transformer may be used in place of batteries. Transformer for Model D & E Viewers plugs into the bottom of the Light Attachment.
